This will help you understand how to use the program. The free trial version lets you refresh a single website at a time. * Important Information: This is a commercial program - Refresher Enterprise is available at www.refresher.com This program is for Windows 9x, Windows NT, 2000, XP and Vista - system requirements are similar. This is a 16 megabyte download. Refresh Enterprise Features: * Automatic Refresh Intervals - You can select when you want your web pages to refresh. Intervals can be set between 1min and 96 hrs.

What's New In?

* Single or Multi Instance * Refreshers Pages Automatically * Websites Automatically Refreshed * Email/Mailbox Automatically Refreshed * Programable Schedules * Personalized Alarms * Undoable * Dual-Tabbed Browser Mode * Printable Webpages * Complete Documentation Available Last edited by zorgon1; 07-08-2009 at 10:04 PM. Reason: forgot to add add/remove I tried to download the exe file from the website but, I couldn't. So you are providing only the Source code. If it would have provided the exe, then I would have definitely downloaded it. I have a quick question for you since you are technically quite good at this. I'm trying to help my friend with this code, and I asked him what he wants to do with it exactly, such as 'which can be used as reminder', 'which can be a note', etc... since I assumed he would want to use it as a task-list and this is obviously not a windows application. Then, I sent him this code and asked him if this could fit his needs (of course, before sending it to him) because it looked like it could. He replied to me saying "Well, I only need one program to remind me to do stuff like log in to the bank and check my own email." Now, I can do a 2 year-project and say 'Hey, we can do all this stuff in java' but, that's a great project, and I wouldn't mind doing it for my friend. But this is not a team project, I'm doing it all on my own, I don't want to take a month or two and then turn it in with a bunch of bugs, so if this is what you suggest, it's fine, but I just wanted to know what was exactly what you recommended since you are so much more experienced than me. Now, you might tell me to simply go to a programming site and start looking for tutorials on how to make these types of programs, because that's what I'm about to do, but I wanted to double check with you first, I know that you are doing this as a hobby. I've modified it a bit so it's not a complete lollipop, but it basically gives me an exe with a script that has an action of 'the count down to 7am-
