What's New In Revel Breezer?

Revel is the most accurate music player on the market. Its algorithms transcribe the music you play with the highest possible accuracy. Revel also reads your musical preferences and makes a recommendation list of music that fits your mood or what's playing on the radio. Revel offers the most accurate music information available on the market. Our algorithms extract metadata from the audio files on your device and encode them in the most efficient way possible. This allows Revel to provide you with album artwork, song names, lyrics, track info and more. _____ Features Updated albums artworks. Revel can also recognize album artwork for a number of different album formats (FLAC, MP3, WAV, Apple Lossless, APE, Ogg Vorbis, AAC, MP3 and more), automatically downloading the artwork for all the songs on the album and including them on the user's device. Revel also downloads lyrics, track names, artwork, and more from the internet and makes them available as easily as the album artwork for every song. Ability to add artist and album artwork from over 50 different album formats by simple drag and drop to the artist section. Complete information about the music, with artist, album, song, lyrics, release date, year, discography, artwork, audiobook, rating, related artists, number of plays, etc. Supports more music formats than any other player. PerfectSongID integration: PerfectSongID is the leading song identification and retrieval platform that automatically recognizes music. Revel's first party PerfectSongID integration is fully free! (available only for iPod Touch) Revel's anti-detection system filters out loud or unrecognizable songs from being suggested on top of the music list. Revel provides a Queue feature that lets you organize your music in any way you like. Multi-Album play: no matter what the genre, Revel can play the whole album in a seamless sequence, without skipping any song. Queue multiple playlists: Revel can play more than one playlist at a time. Import/Export formats Import: all the files on your SD card and on your iTunes library are supported. Export: You can export the tracks that are in your library to iTunes in formats such as M4A or AAC using the iTunesExport feature. (we will not harvest any personal or audio information for any other purpose, unless you have given us permission to do so)
