I know that my sub menu not working because of the function. My question is how to make the javascript function which should be called in menu so its call function works in the script which is in sub menu. A: The function invoicenumber isn't being called, because your script call is being called before the menu is generated. Either move the invocation of the menu function inside your script, or move your function invocation to be on the same line as the script call. \$(document).ready(function(){ \$('#menu').menu(); invoicenumber('blah'); }); The invention relates to a tool for cleaning a surface, especially of a workpiece or structure on a substrate surface. In particular, the invention relates to cleaning of a surface of a power transistor. Cleaning systems for surfaces of workpieces are used in a number of different industries. Such systems utilize a gas or liquid/gas mixture to apply a force, referred to herein as a cleaning force, to clean the surface of a workpiece. The cleaning force is created by a source of energy, generally either compressed gas or the recuperative energy of an electric motor. U.S. Pat. No. 5,163,051 to the present inventor, discloses a cleaning system in which a compressed gas is energized to produce a cleaning force. The cleaning system includes a cleaning tool having a gas channel around the gas discharge nozzle. The gas channel receives compressed gas from a compressed gas system. The compressed gas energizes gas discharged from the gas discharge nozzle. The cleaning 1cb139a0ed
