Unfortunately, Photoshop can be a frustrating experience for beginners. It's not for beginners, although it can still be useful to beginners because it makes a world of different professionals look like easy beans. Photoshop has a fairly steep learning curve, which is probably the main reason that beginners don't use Photoshop. For someone who is new to photography, learning Photoshop can feel like a labyrinth of menus, filters, and steps. If you're interested in learning Photoshop, or if you need help learning it, you're about to embark on a journey that should be fun. Photoshop Basic Setup The first thing you'll need to do is activate the Photoshop program. Start Photoshop, choose File from the File menu, and then click Open. Now that you're open in Photoshop, we're going to adjust the menu settings to make things a bit easier on you. Click Window from the File menu to open the window that controls the Photoshop interface. You'll see a tiny shortcut menu. The one you want to use is the Options menu, which you can open by either clicking Options near the top of the Photoshop window, or by using the keyboard command of Option on your keyboard. Don't forget to click the Options menu again, or use Option on the keyboard, to close the menu after you've adjusted the menus. Now you have two menu options that you can use to adjust the menus. Select Help from the Options menu to display the Photoshop help screens. Use the Help menu to display help when you need it. Click the Help menu again to close the Help menu. The Help menu is also the exit menu for your Photoshop session. Click it to return to the beginning. Setup the Photoshop Interface Now you'll get a bit of a chance to make some changes to the Photoshop interface. Use the Cmd/Ctrl + Q keyboard shortcut to close the Option menu, and then use Cmd/Ctrl + A to select All. Now use the keyboard shortcut Cmd/Ctrl + Opt to shrink the menu and display more of the Photoshop interface. So far we've made some changes to the menus,

but we haven't made any changes to the interface itself. Clicking the Window menu at the top of the Photoshop window will expand the Photoshop window and display a number of subwindows, including the Browser, Layers, and History panes. We're going to be using the Browser, Layers
