– Increases performance and stability of your graphics card by addressing causes of heating, instability and other problems – Detailed analysis of the GPU temperature, voltage, fan speed and cooldown – Adjustment of the GPU and memory clock, as well as fan speed based on temperature – Control of internal fan power by temperature – Graphs of GPU temperature, voltage, fan speed and CPU temperature – VGA test and tweaking – Power options – Application shortcut to run directly – Integrated GPU Tweak Tool – BIOS update in case necessary (automatic) – GPU Tweak Tool – BIOS upgrade/flashing ASUS introduced the custom ASUS GeForce GTX 980 STRIX OC 4GB to accelerate several AAA games in stunning 4k. The GTX 980 STRIX OC 4GB supports NVIDIA GPU Boost 3.0, NVIDIA's new technology for dynamically adjusting GPU clock frequency for better performance. Equipped with GPU Tweak, this model is also easier for users to enjoy multiple monitor configurations. ASUS has revealed the GTX 980 Strix Premium edition. The new reference GeForce GTX 980 Strix is based on the new GM204 core and fully relies on the faster GP104 GPU. The GeForce GTX 980 Strix OC 4GB is equipped with a fully modified PCB. It features a default clock speed of 1126 MHz. All drivers are up to date and fully optimized to give you the best gaming performance. The NVIDIA GTX 980 STRIX OC 4GB uses full cover Double Slot cooling that features two coolers rather than the double slot tubes. It is very well-equipped to keep your GPU cool. The NVIDIA GeForce GTX 980 STRIX OC 4GB comes with the new dual-DVI interface that provides 30 percent better output than the original, and the ASUS SP250M series 6 port 2.0 high-speed USB 3.0 is used for intensive applications. You can also use the traditional 6 port 2.0 USB 3.0 ports to connect with other devices. The "GTX 980 OC 4GB" comes with a factory overclock of 1126 MHz for the GPU and 855 MHz for the memory, and ASUS Turbo Clock. This card also has a 6-pin fan power connector. In addition, the graphics card supports the latest DirectX® 11.2 and OpenCL™ 2.0 standards and offers a range of overclocking features. The ASUS Super Alloy Power II+ technology provides
