“The design of our engine was always around visual fidelity,” said Colin Nanos, game director at EA Sports. “We focused on how to make a clean, beautiful experience that doesn’t weigh down the game system. Our technology and engine allow us to deliver real-world player motion and performances, giving you an authentic feeling of playing as the real-life 22nd player. We have captured his brilliance in motion.” Hybrid Wisdom Control - or HYBRID HYPER-CONTROL - features a new control method, allowing users to practice and fine-tune with the controls and sensations of the game using both analog and digital input devices. The game also features ball physics that will ensure players are physically challenged with controlled, accurate passing and shooting. “The football player movements are first-class,” said Christoph Knittel, executive producer. “Our ambition was to make the player movements as authentic as possible. We have spent months researching and getting that right.” EA SPORTS Player Intelligence - or EA SPORTS PLAYER INTEL - allows the game to tell you when you are onside, when a teammate is in a position to receive your pass or when you are about to be tackled. They are also able to predict the next move from the opposition and give tips. “This is probably the biggest technical feature in the game,” said Christoph Knittel. “We have done a year-and-a-half research and development, creating an AI that can predict what the opponent will do and is so good, he actually tells you what to do next.” Maneuvering and techniques that are successful in real life transfer to the game. For example, players can jump and head the ball whilst moving. Defending a high ball is done differently than in real life, whereas in FIFA 22, you can do a slide tackle with outstretched arms. All of these elements allow the game to be a true football simulation. The new FIFA Ultimate Team mode now features over 50 real-life Pro Clubs, including Juventus, Manchester United, Bayern Munich and Juventus. The game will also see the introduction of big enhancements to the FIFA Ultimate Team experience. The game’s biggest feature is a new version of Draft Champions that has received a number of substantial changes. Users will now be able to play a longer season, full of challenges
