Try to convert any image format to a small thumbnail of the original using a simple app that allows you to adjust quality settings. 100% CLEAN Certification Thup App Guard helps you protect your privacy by allowing only apps from a trusted universe of developers to read your files and record your screen. Latest Software Review: 1. Kill Switch: Protect Yourself from Malware and Ads (2/5) It seems like Kill Switch is another good application out there, that's all nice, but it's also very poor, very unfair. So you may be interested to know what's wrong with this app. It may be a good thing to find out. This app can be simply classified as an app that can help you to get rid of ads on your smartphone and tablets. There are few things that this app can do, first of all you can disable advertisements on your screen and disable background update. This two are very important because it allows to protect you from malware. These two can be enabled with the help of Passwords. The most amazing thing about this app is that it is very simple to use and has a clean interface. There are many apps like this but mostly they fail to keep up with the quality so this app has a clean interface, and it is completely free. Another function which you can achieve by enabling this Passwords is to keep intruders out of your phone or tablet. People who wish to get some ill-desired things from your phone or tablet, your device can be infected with malware and other viruses when you don't have an antivirus app. So, disable updates when you are not in the mood and know it's safe to turn the app off, in the meantime, protect yourself. When you're done with that, you can enable the second Passwords that can help you to protect your privacy. There are many apps like this but this one is completely free and simple to use. It's all good! To sum everything up in few lines; you can protect yourself from malware and ads. Another feature that you can enable is when your Android phone rings, or when any number is called and you receive this, you can enable the option "Block calls from this number" and it will allow you to stop receiving calls from a certain number. It is very simple but very helpful. The biggest downside is

Thumbnail Creator is a highly capable application that can be used for a couple of tasks. The first one is to convert those massive files on your computer into smaller thumbnails. The second thing is to organize the mass of images on your desktop using designated folders. Thumbnail Creator allows you to select thumbnails from among those ready-made images as well as from those in your image library. A better look at the actual transformation can be observed in the preview section, where you can see the results directly. You can also create a HTML page that displays them all, and can be viewed anywhere on the internet. The application doesn't come with any image editing capabilities, though you can acquire them for a reasonable fee. « Previous Post: How to hide / unhide files on your hard diskdrive after renaming them in Windows 7 » « Next Post: Linux Command Line Applications » If you were to ask me where I feel my 'ears' are, I would say on the back of my hands. So when I felt pain in my left ear, I decided to do a little research and google the following phrase: earache. As a result, I came across a link to a post by an Australian who solved a similar problem as I did. He did so by creating a new partition that used all of the free space on his hard drive. He then modified his fstab to reflect this new partition. Is it really as simple as doing this? No. I would bet hard drive manufacturers would be against something like this, so don't expect a fix like this. However, for those of you like myself who have moved around a bunch of times, and who are tired of re-sizing partitions, this is a nice little hack. So here is what you have to do: 1) Create a new partition that you would like to be a swap partition using your free space on your hard drive. In the following example, I'm using a 4GB partition, but if you have 25GB free, then you can do this. 2) Install a copy of syslinux. 3) You will probably need to do some reading on the syslinux site, but here is an excerpt that should help you out: To install, simply type this at a command prompt: `./install.sh` When it asks for a partition number, type a number (1234 or similar): 4) Now, create a 512MB file in the filesystem. In the root
