I've had a hell of a time with the help of my friends figuring out what my toaster was. It was a huge job having to ask the people from the toaster store every day if this was in fact a "pop up toaster". But I gotta give it to them they did sell it with a name. Here's what we called it.....It was called the "Pop outtoaster". It was designed as one product with two purposes. One to toast and one to pop out the bread. The problem was the toaster would have the bread go all the way into the toaster and the mechanism would have the problem of not being able to pull it out. We had a wonderful time trying to explain this to people as they would ask the staff what it does and they had no idea.
