palomino also created a stage show with the band. stage shows can include special effects, costumes, and lots of video footage that give a better, multimedia experience to the stage show. it was meant to be like a band concert on stage, but we put it on a boat to create a bit of an otherworldly experience. the whole experience is one of the most intimate that a fan can get and i think that makes the series so important. and what we try to do is to continue to create that quality so it becomes an unforgettable experience for a fan. this is a true alchemy or a true marriage of organic rock music and drama. while we can't completely explain what we're doing, we do know what kind of music that we are writing and we know how it should be put on stage and heard. as the band's career starts to wind down, perry continues to record and perform, releasing albums such as "vapor trails," as well as putting out a compilation called "perry's picks" covering songs from the band's various demos and out-takes. perry's first solo album, "the anti-quarium," was released in may of 2008. in september of 2008, perry started his second solo tour, covering some of his favorite hanson tunes, and supporting the release of a new solo album called "do it all over again: acoustic classics." some of our goals for beyond the spectrum are to have live music be a major component of the college music scene; raise the profile of the genre as something to be taken seriously by the general public; and, above all, to be a cohesive unit in the evolution of the lives of the band members. this past year has been more satisfying than most for us. we have found that the movement is worth more than the individual members of the band.
