After thoughtful consideration, we have decided to make Photoshop a subscription-only product. As part of this decision, based on the feedback we have received, here is what we're changing. Starting January 15, 2020, we will convert Photoshop into a subscription-only tool. For Photoshop, we will remove the ability to buy and download a perpetual license. We will also encourage customers with subscriptions to consider reviewing and renewing their subscription within the next year. In line with this update, we will remove support for the Circuit Dual printing system going forward. We will also make a necessary change to the Preview (Lightroom) web player functionality, so you won't be able to buy and download a perpetual license for Preview if it has been opened via a purchased subscription.
