FolderUsage is an intuitive software for quick analysis of your disk space usage on your PC. It shows you a lot of useful information about your disk usage: free, used, available and total space, and how much of each. You can analyze the usage of any directory and, when necessary, you can also easily select multiple directories to get an overview of how much space all those directories are using. It will also show you the number of files and folders, and the size of each of them. You can also select different types of sorting and the program will organize your list according to the selected criteria. When analyzing any folder, you can also easily copy the details of its contents to the clipboard so you can paste them into a spreadsheet, a text file or even into your email. FolderUsage is a free product. There is no serial number or license required. You just need to register your license at the official website. The registration is free, but you need to input your email address. FolderUsage also can be used to automate some boring tasks, for example, auto-removing large files. For example, the program can automatically delete old files that are more than 10 days old, because it has been found that there is no need to keep them in the folder. Their lives were irreparably damaged. Their legal rights were stripped from them. Our federal government has no business interfering with family separations. The cruel and illegal policy of separating families should be stopped immediately. It violates our values and is fundamentally immoral. It is a clear message that our government does not prioritize the human rights of immigrants. If it did, it would reject the 5th Amendment for all undocumented immigrants. We must stand with those immigrants that we have the power to protect. The only way to do this is to reject the 5th Amendment and deny all undocumented immigrants the right to a trial and protection from torture. This issue is not about us versus them, it is about America being a nation of laws and honoring basic human rights. Sign the petition This petition was delivered to: President Trump
